

Road Construction on Twelfth Street project will begin on June 26, 2017

Hallack Construction has notified the City that they intend to mobilize and begin construction of Twelfth St from Oak St to Maple St and Oak St from Twelfth to 9th St beginning Monday June 26th.

Work on Twelfth St will include full reconstruction to Major St standards and will include storm sewer connections, curb and gutter, bike lanes and a new sidewalk on the south side. Work on Oak St will include pulverizing the existing asphalt and grading to improve the road base with new asphalt being placed.

The project is expected to span four weeks to complete. During construction, Manistee High School and facilities can be accessed from Tamarack St off of Eighth St.

Funding for the project is derived from the City of Manistee's Major and Local Street funds along with approximately a \$10,000 credit from the Reith Riley Development agreement when the Liquid Asphalt terminal was constructed along Manistee Lake at State St.

Question can be referred to the City of Manistee Public Works Department at (231) 723-7132.
